

Sprint's Workforce Locator is a simple way to manage your mobile employees. Workforce locator allows Administrators to view the current and past locations of workers on an interactive map.

Features

On Demand Location

Locate employees on an interactive map in real-time, with the ability to send them messages and directions

Automatic Tracking

Active and Scheduled tracking allows the Administrator to receive automatic location updates

Worker History

View location history from the application or receive reports via email

Communicate

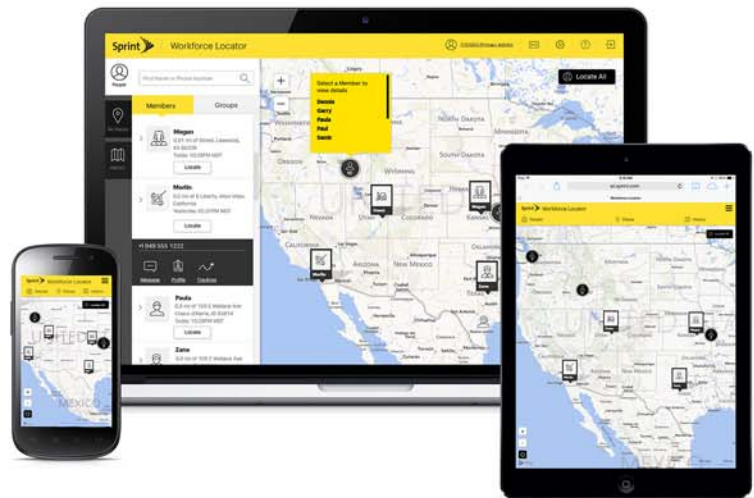

Message one or all of your workers at once directly from the application

Save Money

Optimize efficiency and reduce cost by sending the closest worker to the appropriate job.

Start Maximizing Productivity Today

Sprint Workforce Locator is a powerful yet affordable web-based location solution that monitors and tracks the location of your mobile workforce. Deployment is easy with no extra hardware to buy, no software to install on mobile devices, and no additional IT resources required.

Cost-efficient

Save money by creating a streamlined process for monitoring your workforce. In addition to getting automatic reports, you can also cut down on fuel costs, find optimal routes, and reduce administrative paperwork by utilizing the easy to use Sprint Workforce Locator application.
